Following will be the schedule of the programme.

Date: 13th & 14th December, 2017

Time: 08:40 AM to 03:30 PM

Venue: Department Compute Centre – H - Block

ABOUT THE COLLEGE

Anil Neerukonda Institute of Technology and Sciences (ANITS), Visakhapatnam was established in 2001 by Anil Neerukonda Educational Society (ANES). ANES works to promote technical, and human values through various educational institutions, without any motive for profit. ANITS is located in Sangivalasa village of Bheemunipatnam mandal, about 30 km from the beautiful city of Visakhapatnam. The college is accredited by NAAC, NBA, UGC and attained autonomous status in the academic year 2015-16. The college was awarded "Center of Excellence" by Infosys Technologies in the year 2011 and "National Employability" in 2014 by Aspiring Minds, New Delhi. The college offers undergraduate and post graduate programs in various disciplines of engineering such as CSE, IT, EEE, ECE, Mechanical, Civil and Chemical Engineering. ANITS has strived to train young men and women into confident and competent engineers. With a unique team of governing body, inspiring management, and proficient educators, ANITS continues to march forward with greater zeal and dedication to become a world class educational institute.

ABOUT THE DEPARTMENT

The Department of Chemical Engineering was started in the year 2012 and has very efficient team of faculty. The faculty participate actively in state of the art research and continuously thrive to update knowledge and skills. The same is imparted to the students in class rooms by conducting workshops, seminars and conferences to craft the next generation of engineers.

The department is well equipped with chemical and interdisciplinary laboratories. Modern teaching methodologies are constantly implemented to foster an improved class room environment. Team work among students is encouraged to inculcate positive work habits and passion to work wisely, creatively and effectively.

ABOUT THE WORKSHOP

Indian chemical industries emerge as one of the focus destinations for chemical companies worldwide, which accounts to \$ 36 billion (3% of the global economy). In addition to producing bulk and fine chemicals through traditional routes, the industries are now focussing on novel technologies such as nano-technology, fermentation and biofuels. The technology of production of chemicals requires intense understanding of process flow sheets which comprise of various types of reactors, pumps, heat exchangers, condensers, distillation and absorption columns etc. The detailed study of process flow sheets coupled with process control helps the chemical engineer to produce the products at maximum productivity. It also allows varying the process conditions in case of any fire and explosion in the industry. This workshop helps in bridging the gap between academic and industrial approach to study the flow sheets. The workshop covers topics like overview of process engineering in industrial perspective, various pumps, process flow diagrams, piping and instrumentation diagrams, trouble shooting etc. The workshop also aids in facing the challenges arised when the fresh engineers start working in the industry

REPORT on "Automobile Explorations – Autotrix"

Dt. 18-12-2017

ANITS SAE Collegiate club has organised a two days workshop on "Automobile Explorations – Autotrix" in the department of Mechanical Engineering ANITS during 15th & 16th Dec, 2017. The workshop was inaugurated by Dr. NBR Prasad (Chairman of ANES), Dr. TV Hanumanth Rao (Principal of ANITS), Dr. B NagaRaju (Head of the Mechanical Department), Mr. M Prem Dheeraj (Faculty Co-ordinator of ANITS SAE Collegiate club) and Mr. Harish Dasari (Assistant Manager, M&M Zaheerabad)

The workshop consisted of both technical presentations and practical sessions. Mr. Harish Dasari, Assistant Manager from Mahindra & Mahindra (M&M Zaheerabad) has outlined the recent trends in automobile engineering and the opportunities awaiting young engineers in this canopy. Other technical presentations were taken up by various experts from JV Workshops, CarPixels, and other automobile firms. The two days workshop includes practical sessions on two wheeler tear down and assembly, where a group of 12 students were given a bike to explore by disassembling that. Students have spent more than 5 hours in learning about all major components of bike and their functioning.

Besides a discerning learning experience on two wheelers, students could also gain an outline of four wheeler engine and other components in the bonnet. The illustration of various assemblies and components observable from the bonnet of the car has helped the students acquire deeper understanding about the functioning of a car in its totality. Students also enquired about several troubleshooting aspects of car.

In the valediction of this workshop students had given their feedback and described the richness of knowledge that they could bag in this workshop. The further requested the Co-ordinator and Head of the Department to organise more such events, in response to which a summer internship with JV workshops was planned out.

More than 126 students had participated in this workshop and about 8 Student Volunteers have rendered their services for the smooth coordination of event. The sessions organised were found to be more interactive and practical with major focus on hands-on sessions.

Towards the end of workshop, students were also given an invitation to attend a 10 day internship program which is certified by Germany in relation to automobile service and

maintenance. Further students were also informed of the opportunities that Government of India wants to bring to the disposal of all budding engineers under SKILL INDIA initiative. In this connection, the resource persons assured all the interested students that they would also offer an internship year to completely make students employable in International Automobile Industry in collaboration with German Industrial training sector.

Report

A 2-days workshop on Robotics with Artificial Intelligence for the students of undergraduates was organized on 23th and 24th Feb 2018 by department of Electronics and Communications Engineering in association with INV Technologies Visakhapatnam. Initial aim of the workshop sessions was to motivate students in design, estimation, fabrication and testing their own ideas of basic controlled robots using AI and IoT.

This workshop comprises of giving the participating students an idea about Robots, Robotics, Types of Robots and their applications, Career in Robotics, Introduction to Artificial Intelligence and IoT. There is considerable anecdotal evidence that students respond well in subjects involving programming of robots. Programming can be too abstract. By having to control a physical robot and seeing what goes wrong, students learn what robots can and can't do. They also learned the need for precise instructions. There's no doubt that there will be a need for people to be involved in programming mechanical devices in the foreseeable future. By programming robots, students can discover if they have aptitude and interest in a job market of the future. Programming Skill will be developed. They will read data from board, on sensor and social network.

In the first day students got familiar with the term Robot, how to identify whether a machine is a Robot or an autonomous bot, Robotics, Aspects of Robotics, philosophy of AI (Artificial Intelligence), Brief on Machine Learning and types of Robots. Informative videos from Boston Dynamics were shown to students. In the Second day students got familiar with, applications of AI and IoT were explained and showed. Applications included S.O.S Morse code, Bluetooth Controlled RC Car using simple LED and Arduino coding; Traffic Light Signaling using LED and Arduino coding.

Feedback from the students was collected and it suggested that they welcomed this initiative and they are motivated to explore more dimension in this platform also they are willing to do projects, research work and developing robots for competitions in future.
