Workshop on “ROBOTICS PROCESS AUTOMATION TOOLS” on 26th and 27th August, 2022

Objective: The main theme of this workshop is to bring an awareness on **ROBOTICS PROCESS AUTOMATION TOOLS**

She started the session by introduction about RPA tools like Automation Anywhere, Blueprism and UiPath. She also helping students to download the Automation Anywhere tool. She clearly instructed the students step by step on how to download the software, install it and run it and even displayed the whole process with a sample video.

After installation, she discussed what RPA means by questioning and making students to think and understand the concept in easy way.

Then, students got to know different tools that are available via using RPA software .After installation she started doing first Hello world program in RPA tool.

Demonstrating the different variables and actions that he went through each stage and guided on how to use different tools and options to get a desired output with a sample inputs.

Then , she explained about how to create bots for sending emails, invoices ,messages and simple calculation process etc.

The workshop ended up with great information provided by the speaker. Numerous students and members demonstrated enthusiasm for the practical guidance session to deep dive and explore into new areas.

DEPARTMENT OF PHYSICS

20-08-2022

Prof D.PAMU from IIT Gowahati has given online presentation in National Seminar about Nano Device Fabrication and their applications enlightened around hundred participants from various institutions.

Dielectric Properties

(a) Dielectric constant (ϵ') vs Frequency (Hz) for temperatures: 298 K, 318 K, 338 K, 358 K, 378 K, 398 K, 438 K, 458 K, 478 K.

(b) Loss tangent vs Frequency (Hz) for temperatures: 298 K, 318 K, 338 K, 358 K, 378 K, 398 K, 438 K, 458 K, 478 K.

Inset: Variation of dielectric constant (ϵ') with Temperature (K) at Frequency = 20 MHz.

Variation of (a) dielectric constant and (b) loss tangent as a function of frequency for MZrT sample sintered at 950°C for 3 h. Inset of Figure 8a, the variation of dielectric constant (ϵ') with temperature at 20 MHz.

The ϵ' values are found to be in the range of 21-28 and $\tan\delta$ is in the range of 10^{-7} at 20 MHz for the MZrT sample prepared by Pulyol method, sintered at 950°C for 3 h.

Participants: Pamu Dobbidi, physics class1, LCE094 SUKALA, kalyan prasad k, K.V.Siva Danga, ECE032 DASARI L., CSM032 KARAKA, 73 ullas, You.

Conclusions

- MgZn_{1-x}Fe_xO₄ (MZF) nanocrystals were successfully prepared by pulsed method. Phase analysis of the prepared sample demonstrated the formation of pure MgO, whereas, at 950°C.
- The processing conditions were optimized to obtain single phase, dense structures with highest density and good microwave dielectric properties.
- The maximum relative density was obtained at 950°C due to the small initial particle size of the prepared sample. This sintering temperature is around 500°C lower than the usual sintering of 1420°C.
- The maximum relative density of 97.52%, ϵ_r of 18.04 and $Q \times f$ value of ~ 173 THz were obtained for MZF samples sintered at 950°C for 1h.

ABOUT THE VALUE ADDED COURSE

Aspen Plus is a process modeling tool used for process monitoring, optimization and conceptual design, especially by chemical process industries. This is a simple course on Aspen Plus Simulation engine that will teach one how to model the most common unit operations of a chemical plant. Basic unit operations such as Pump, Reactor, Valve, Heater, Distillation Column etc. will be demonstrated which would be helpful for students, teachers, engineers and researchers in the area of R&D and Plant Design/Operation. The course is didactic, with a lot of applied theory and case studies. At the end of the course one will be able to setup a simulation, run it, get design parameters, optimize and get results. This is highly recommended for those who are willing to take a career in simulation/modeling via software.

Course objectives:

The student will be able to

1. Model a unit operation
2. Simulate unit operations and unit processes
3. Analyze the parameters and variables

Course Modules:

Topic 1: Introduction to Aspen simulation

Topic 2: Property estimation

Topic 3: VLE plots

Topic 4: Simulation of pump

Topic 5: Simulation of heat exchanger

IEEE SB ANITS- WORKSHOP ON "DATA VISUALISATION USING TABLEAU"

Objective: The main theme of this webinar is to bring an awareness on THE TABLEAU TOOL.

She started the session by helping students to download the tableau software. She clearly instructed the students step by step on how to download the software, install it and run it and even displayed the whole process with a sample video.

After installation, she discussed what tableau means by questioning and making students to think and understand the concept in easy way.

Then, students got to know different products that are available via using tableau software .Utilising the desktop version she started with introduced the 3 main stages of the creating a visualization

1. Import – To import data from different or local resources.
2. Analyse – To utilise the tools provided by the software and create a visualization by analysing in different angles.
3. Share – To share the final dashboard to the client according to his specifications.

Demonstrating the above 3 stages she went through each stage and guided on how to use different tools and options to get a desired output with a sample problem statement.

Firstly, madam created a sample visualization on profit and sales of certain categories for over certain period of time and showed how to analyse the trends of the sales of the product by producing different combination like line charts, area charts.

Secondly, She explained how to analyse data using geographical representations which makes cool and easy to observe trends, which can also be linked to particular url pages according to specified patterns and locations.

Then she explained, how to combine those two different visualizations into dashboard to create a nice viewing experience and explained various others properties to customize the experience even more better.

The workshop ended up with great information provided by the speaker. Numerous students and members demonstrated enthusiasm for the practical guidance session to deep dive and explore into new areas.

Her outstanding efforts as a student & volunteer made her achieve all these better positions.

In addition to all this shes very good at academics And her special achievement can be said as she is an **University innovation fellow** under **hasso platter D.school Stanford university** and now she has got an opportunity even to be an university innovation guide to mentor students and be the leader of student change program from **Stanford University**.

She is also Awarded as the

- **Winner of IEEE Computer Society Richard E. Merwin Scholarship (\$1000 USD) for Fall 2021 Cycle.**
- **Best Exemplary Student Volunteer Award 2021 from IEEE Hyderabad Section SAC**

The event was started at 10:00 AM and continued till 12:00 PM.

Roller-compacted concrete (RCC) is a low-cost, fast method for concrete construction and repair. When working with dams, RCC can be used to repair damaged overflow structures, to protect embankment dams during overtopping, and to raise the crest of a dam. Another use is to build a buttress on the downstream side of dams to increase dam strength.

- After completion of Virtual coding interviews feedback form is given to the expert to fill regarding the students in which area an individual student should improve.
- The same suggestions are intimated to the students as well.
- To conduct Virtual coding interviews online platforms like Zoom and Google Meet are used.
- The link is created one day before and is shared to the students as well as to the Experts.
- To share any information regarding the mock interviews, a whatsapp group has been created. In that group the members will be Head of the Department, Faculty coordinators and students.
- Head of the Department and Faculty coordinators will be the Group admins. Each panel once they finalize according to the CGPA will be added to the group by Group admins.

- In that group once the students are added they will be getting information about the Virtual coding interviews. Information like s, Link to the meetings and any information given by Expert.

Instructions to Students:

- For each and every panel the meeting is held by the Head of the Department (HOD), faculty coordinators to the students.
- The instructions to the students are given in a clear format regarding the body language, the formal attire, and the network connections as well as the updated resumes which they need to send to the faculty coordinator.
- Guiding them what should be present in the resume and telling them they should have a grip on what they have mentioned in the resume and also to brush up their technical skills.
- A resume has to be submitted before the deadline.
- If the students are unable to attend the Virtual coding interviews due to any reason they have to intimate earliest so that faculty coordinators can replace them with other student's. So that the other student doesn't miss the chance.

Summary Report

- The main motto of conducting Virtual Coding is to know the knowledge of the students related to coding.
- Most of the students want to appear for high package companies like Google, Yahoo, Amazon etc. For such students this Virtual Coding will be more helpful.
- We are inviting the Experts who have very good knowledge in different technologies.
- Based on the experts' queries in the session the student will be able to understand how much he/she is able to solve the queries given by them.
- The Experts are also from different areas who have Industry Experience more than 14 years.
- We are conduct the first session through Google Coding in the second week of October
- The Industry Expert Ravi Kiran Jagarlamudi who works as a Team Lead @ Splunk, Ex-Facebook engineer (Mobile)at San Jose, California, USA is invited to conduct the Virtual Coding Session in the second week of October
- These Virtual Coding sessions will be conducted to current Final years where 6 students are selected based upon their CGPA
- In the first session expert interact with student, expert identify the level of coding in different programming languages and give suggestion to them like practice coding contest in Leetcode

- In the next sessions it is one to one interaction, expert interacting with one student at a time, expert giving a problem statement through Jam board and google docs, student first explaining what he or she understood then he/she writes logic through Collab edit and GDB compiler.
- After students completed his or her logic, expert gave feedback to the student, how he analyzes the problem and coding skills etc.
- After completing the session, we shared a google form to the expert and gave suggestions and at what level there are in the coding, communication skill, problem solving skills.

IMPACT ANALYSIS OF Virtual Coding INTERVIEWS

- A Virtual Coding interview helps you learn how to answer Complex Problem Statements, develop interview strategies, improve your communication skills, and reduce your stress before an actual job interview.
- During a Virtual Coding Interview the interviewer may use a semi-structured interview format rather than asking a formal list of problem statements and before starting the interview interviewer asking on which kind of companies are they interested like service based or Product based on he approach the student.

Introduction:

The C program is a scripting language that can be used for development coding websites and applications, processing images, scientific data, and more. The program can be found in action on the Google search engine, NASA, Disney, Pinterest, and more. It was built for ease of use and speed and is less complicated than Ruby and other similar object-oriented programming languages. Because it is open-sourced, the program has enjoyed popularity among developers and programmers, and it continues to be the base program for most websites in operation on the internet today.

C software is free to download and can be accessed on virtually every type of operating system. It comes with a large standard library that will make programming simple tasks, such as reading and modifying files, connecting to web servers, and more, easy. Companies such as Nokia, IBM, Google, and Disney were all searching for programmers with Python experience to help them with web applications and framework development; in this respect, Python works perfectly with Django, which functions as the base framework system that Python builds on. Python also enables programs to script professional-grade web-based products. From back-end to front-end development, full-stack, and web-based options, Python programmers continue to find more economic prospects as the use of the language grows to encompass all areas of software and web development.

"Emerging Technologies - Coding Paradigms"

DATE: - 27th Feb 2021

Number of participants: - 50

Objective:-

Awareness of trends in technology on "Emerging Technologies - Coding Paradigms"

Speaker: - S Goutham Kumar (317126510115)

Mr. Goutham Kumar is the Vice president of Computer Society of India(CSI) , Student Branch Anits. He started his seminar by extending his gratitude to all the students who attended the seminar. He has a lot of knowledge on all the current emerging technologies that were trending.

According to him the top 6 Emerging Technologies are:-

1. Artificial Intelligence
2. Machine Learning and Data Science
3. Internet of Things
4. Block Chain Technology
5. Virtual Reality
6. Cyber Security

Mr.Goutham explained all the above technologies and gave a pre-requisite knowledge of how to learn the technologies and master them !!

He provided a road map to the students for becoming a good competitive programmer by suggesting platforms for practicing like HackerRank for basic learning, HackerEarth for learning DSA, leetcode for dynamic programming.He also showed how the platform works and how they can compete with others.

Many students were raising queries on cyber security and ethical hacking. So he started his session with cyber security and cleared all the doubts of the students . He explained the roles present in cyber security, different types of hats, etc. He provided some resources for future reference.

According to him, to start a career in cyber security, students must be strong in subjects like Data Communications, Computer Networks, Operating Systems, Cryptography and Network Security. Again, the students raised a doubt that how we should be certified and how to start learning from the scratch.

He presented a platform for learning cyber security courses.

Website link: <https://www.eccouncil.org/>

He explained the basic certification courses required for students who are interested in the field of cyber security like CEH, CCNA, CCNP, OSCP for advanced level. He also introduced some basic terms of networking and gave an overview on the subject. He discussed about the ongoing projects in google.

Students approached Mr.Gowtham Kumar personally and asked many doubts regarding placements and how to start learning and he gave suggestions.

Here he was explaining about the web development queries asked by students.

Title: Awareness of trends in technology on "Emerging Technologies - Coding Paradigms"

A Report on Failure of NDT Techniques and Analysis

10/02/2021

To gain experience with and understanding of the types, advantages and applications of various NDT methods. To be able to choose the best NDT method for a given part. In certain applications, the evaluation of engineering materials or structures without impairing their properties is very important, such as the quality control of the products, failure analysis or prevention of the engineered systems in service. The field of NDT is a very broad, interdisciplinary field that plays a critical role in inspecting that structural component and systems perform their function in a reliable fashion. Certain standards has been also implemented to assure the reliability of the NDT tests and prevent certain errors due to either the fault in the equipment used, the miss-application of the methods or the skill and the knowledge of the inspectors.

These methods can be performed on metals, plastics, ceramics, composites, cermets, and coatings in order to detect cracks, internal voids, surface cavities, delamination, incomplete defective welds and any type of flaw that could lead to premature failure. It is with this perspective, Department of Mechanical Engineering has organised a guest lecture on " NDT Methods and Analysis" by B Rajesh of Indian Railways – Ananthapur Division and G Satish of Naval Dock Yard Visakhapatnam.

SUMMARY REPORT

Webinar on Mobile Application Development Using Xamarin

The Department of IT has organised a **Webinar on Mobile Application Development Using Xamarin** on 4-06-2020. Xamarin is an open-source platform for building modern and performant applications for iOS, Android, and Windows with .NET. Xamarin is an abstraction layer that manages communication of shared code with underlying platform code. Xamarin runs in a managed environment that provides conveniences such as memory allocation and garbage collection. Xamarin enables developers to share an average of 90% of their application across platforms. This pattern allows developers to write all of their business logic in a single language (or reuse existing application code) but achieve native performance, look, and feel on each platform.

Expert Heshan Patirana, Senior Software Engineer, - Capita Land, Singapore had a discussion and hands on experience with Xamarin brief discussion on the architecture and working of the Framework for Mobile Application. It helped the students and faculty to get excellent knowledge on Xamarin for Mobile Communication. The total number of 70 participants are from Anits, Union Christian College, Always. Mr K. Chandrasekhar, Assistant Professor IT is the faculty coordinator of the event.

SUMMARY REPORT

Webinar on Technological Trends in IT Industry-DevOps

The Department of IT has organized a two days webinar on Technological Trends in IT Industry-DevOps from 23-06-2020 to 24-6-2020. The webinar was planned to make students aware of the new technologies that are popping up in the software world. As students are in a panic stage after being affected by the pandemic situation we the department of IT thought that creating awareness of different technologies there usage and application to real world problems would create an enthusiastic environment to students and encourages them to explore these technologies in their free time that is abundantly available now comparing with regular timetable of going and coming from college, home sick etc. Anirban Pal was a great orator and a simple professional, interested in teaching and working in techM.

Introduction of the Chief Guest:

- Mr. Anirban Pal, Enterprise Architect,
Tech Mahindra
- He pursued Bachelor's degree in Computer Science & Engineering from M.S. University, India, M.S. in Software Engineering, BITS, Pilani – and was Univ. topper. He was a Professional excellence awardee for years in 2002, 2003, 2004, 2006, 2008, 2012, 2016, 2017, 2018. He also grabbed multiple techM awards like Pat on Back, ACE star rater, Grand Salute, etc.

Highlights of the Topic :

DevOps is a set of practices that combines software development (*Dev*) and IT operations (*Ops*). It aims to shorten the systems development life cycle and provide continuous delivery with high software quality. DevOps is complementary with Agile software development; several DevOps aspects came from Agile methodology. The speaker elucidated the history related to devops and how its existence changed the process of the systems development life cycle. He also narrated the clear difference between agile and devOps. The practical session gave a clear idea of how things are planned and executed. The total number of 100 participants are from various colleges like Gitam, GMR, Anits, Dadi, MLR.

SUMMARY REPORT

Webinar on Data virtualization-Implementation in DEV test and RPA,Tools and Methodologies

The Department of IT has organised a Webinar on Data virtualization-Implementation in DEV test and RPA,Tools and Methodologies on 05-06-2020. The participants are both faculty and students

The traditional software development process takes a long time to develop and deploy software. The webinar is for both faculty and students. There is very less time to do testing, and manual testing becomes a long and tedious process with its issues. The quality of software could get compromised during this long process. DevOps and Virtualization help with these problems.

Virtualization is the process of creating and running a virtual instance of something. In most of the cases, there is a layer of abstraction between the actual hardware and the virtual instance. That way, we can increase the capabilities of a system.

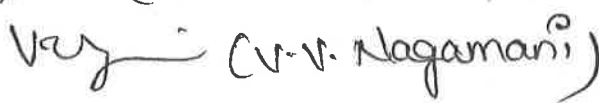

DevOps is a set of practices, which automate the build, test and delivery processes making the processes faster and more reliable. It automates the processes between development and IT teams

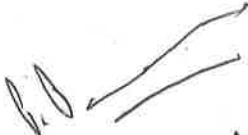

Continuous delivery/Deployment is possible by the versatility of virtualization and containerization technology that allows upgrades to be tested and distributed with improved reliability and accuracy on multiple servers.

Expert Mrs Joyeeta Malik, A V P Wells Fargo Technologies, Hyderabad discussed about how they can be implemented in real time applications and its importance. The total number of 30 participants are from various colleges like Dadi, Anits, Vnr Vignan, etc.. The faculty coordinators are Mrs K.Swathi & Miss V.V.Nagamani, Assistant Professor in IT Department.

The screenshot shows a Zoom meeting interface with a grid of participants. The main slide displays a problem involving a histogram. The text on the slide reads: "There is info for heights of buildings. Each building will have its own height. Given an array of heights of buildings. To a rain stream, how much water will be trapped between the buildings if we consider the flow to follow the area of water trapped between the buildings." Below the text is a histogram with 9 bars of varying heights. The x-axis is labeled 'h' and the y-axis is labeled 'h_i'. The x-axis values are 1, 2, 3, 4, 5, 6, 7, 8, 9. The y-axis values are 1, 2, 3, 4, 5, 6, 7, 8, 9. The bars have heights: 1, 2, 3, 4, 5, 6, 7, 8, 9. The problem asks to find the total area of water trapped between the buildings.

Every entrepreneur has a different story about why he or she decided to start a business. Some have known from day one that they wanted to work for themselves and others come up with ideas while working for someone else and decide to take the entrepreneurial leap.

Most business owners will agree on one thing -- being an entrepreneur and owning a startup is great.

A certificate would be issued to the participants

ARTIFICIAL NEURAL NETWORKS, RECENT TRENDS AND CHALLENGES TOWARDS MAKING SMART LIVING

In 2020, artificial intelligence will move from the hype state to practical usage and value, as corporations begin to harness its power.

Data for AI will be a major theme throughout 2020, from new techniques that train AI on less data to data privacy protections gaining traction.

On the positive side, AI trends include energy-efficient AI, quantum neural networks and the role of natural language processing in understanding proteins.

There are also challenges ahead as AI gains traction. "Deepfakes" are becoming more mainstream, making it difficult to discern real media from fake media. We may also see an increase in malicious applications of open-source AI tools — which have been fundamental in democratizing AI.

Some trends include:

- Commercial deepfakes will resurrect celebrities, shake up retail, and change media
- AutoML: AI is the future of AI design
- Federated learning will bring in a new data partnership ecosystem
- Doing more with less: Tackling small data problems in AI will be a major focus
- Natural language processing will help us understand the building blocks of life

GUEST LECTURE

Topic: How not to be rejected by companies, Interview Preparations

Date: 6th March 2020

Classes Attended & Number of beneficiaries: 200 members

Objective: Major focus was given on ways to help the students know about entrepreneurship opportunities in the market and help them to start up their business.

Name and details of the resource person: Dr. Duvvada Ram Prasad, General Manager (Projects), RINL, Vizag Steel Plant.

He has started his speech by extending his gratitude to the Principal, Head of the Department, cse Faculty, coordinators and Students.

He explained and motivated the students how to not get rejected in interviews from his seven golden policies. The policies are:-

1. Always leave Room for Plan B: Don't pin your hopes on one specific job in the belief that it's a perfect fit. If you don't get that job, depression will follow. It's also smart to pursue multiple opportunities even when you don't want to.

2. Avoid getting your Needs Met through Interviews: Never consider an interview the best way to satisfy your professional validations. If you do, you're bound to experience disastrous results, since employers want to know how you can help them, not how they can help you.

3. Ask for Feedback: While most employers refrain from sharing solid feedback if you don't get the job, there's no harm in asking for a constructive feedback.

Head of the Department of
 Computer Science & Engineering
 Anil Neerukonda Institute of
 Technology and Sciences

4.Never Bring Up the Past: Once rejected, we tend to relive the situation and discuss it with others when we shouldn't. Instead of focusing on rejections, try to focus on instances when you've succeeded and when your expectations were met.

5.Consider Your Strengths: Once rejected, it's very easy to blame yourself and find faults with your resume or even your personality. Don't beat yourself up just because you've been rejected for multiple jobs

6.Understand That You Aren't Alone: Many more people are turned down for jobs than land them - that's a simple fact. Once you accept that, you can focus on the next opportunity.

7.Keep a Positive Attitude: The best way to deal with rejections is to keep a smile on your face. Turn each rejection into a learning opportunity and stay focused on your ultimate goal. The day will come that you and great job are finally matched.

Finally he concluded his guest lecture by wishing all the students to be successful in their life.

CSI- Coding contest

Date : 02/02/2020(Round-1) & 08/02/2020(Round-2)

Target Audience: $\frac{3}{4}$ CSE

Programming requires a person to be creative and have insight about a problem as well as the ability to break the solution down into instructions that a computer can follow. Code refers to the language that a computer can understand. Though the computer is powerful enough to look through masses of data, it is stupid because each operation is mechanical and should be embedded manually.

Third year students participating in the contest

CSI helps its students to nourish the ability to solve complex problems using coding. Competitive coding helps students know their standard in this competitive era. A coding contest is conducted exclusively for the students of $\frac{3}{4}$ BTech from Departments of CS&IT of ANITS college by the ANITS CSI student chapter. The contest took place as two rounds. The first round of the contest took place on 02/02/2020 in which coding questions related to real time problems were tested. Taking Problem-solving skill as a criteria, the students who solved the problems are shortlisted for round 2. Out of 70 participated students from first round, 45 students are shortlisted to next round by considering optimal solution within time limit as criteria. The final round of the contest took place on 08/02/2020. Out of 45 participants Abhiram, Vasanth and Aditya secured 1st, 2nd and 3rd prizes respectively.

Sample question from the contest :

A group of connected 1's forms an island. There is a matrix of $N \times M$. You have to find out the numbers of item.

Example:

If there is a matrix:

1	1	0	0
1	0	1	1
1	1	0	1
0	0	1	0

Here three groups ones are possible. One is red one is yellow and one is blue.

Workshop

Topic : IoT with Python

Speaker : Mr. S.Bosu Babu

Mr S.Bosu babu is working in ANITS as an assistant professor.

The session started with a brief introduction to IoT. He defined IoT as “system of inter-related computing devices, mechanical and digital machines, objects, animals or people that are provided with unique identifiers(UIDs) and the ability to transfer data over a network without requiring human-to-human or human-to-computer interaction. He then explained about the major components of IoT . The components are a device, gateway, cloud, analytics, user interface. He then introduced microcontrollers like Arduino, ESP8266, RaspberryPi and their hardware structure. He then explained the features of Python that makes it ideal to work with IoT. The features are easy to learn, speed, Library support, embeddable, extensible, interpreted, portable, free and open source, community supports.

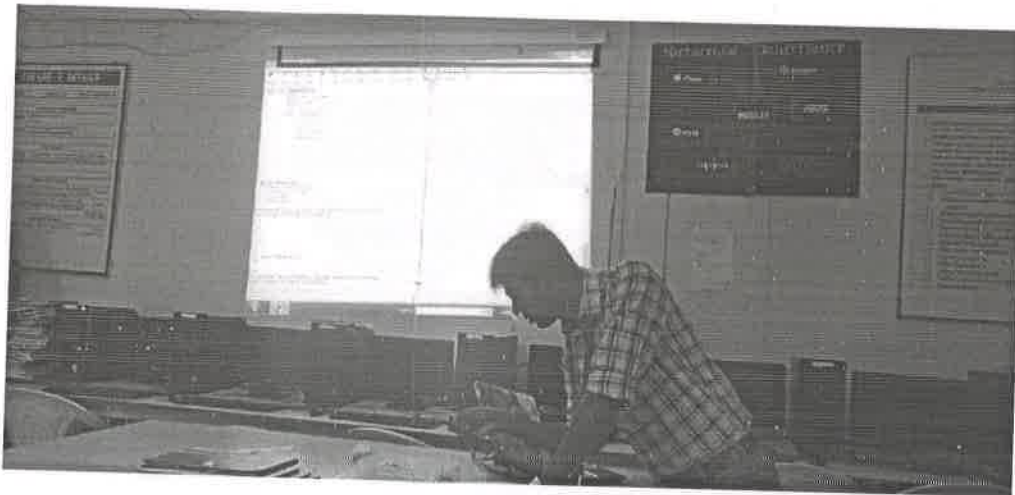

Demonstration of bread board connections with LED

In this session, Mr.S.Bosu babu has addressed three modules. Firstly, Programming an LED with the help of Arduino. He gave brief introduction to the architecture of

Arduino kit and then constructed the circuit and made the students to code.

Demonstration of sensor connected circuit

In the second module, he introduced sensors and its types. In his words, a sensor is a device that converts physical parameter like temperature, speed into a signal which can be measured electrically. Different types of sensors include temperature sensor, proximity sensor, light sensor, pressure sensor etc. He further explained the circuit used to program temperature sensor.

In the third module, he explained the operation of a button using servlet. Servlet is a small java program that runs within a web server. Servlets receive and respond to requests from web clients, usually across HTTP. He demonstrated the program using an android phone. He has connected the application in his phone with an LED device. As he presses the button in the application of his android phone. HTTP request was sent to server and java program was executed which thereby turned on the LED device.

Mrs.Hima Bindu has been working as a senior project manager in Wipro Limited.

Team CSI welcoming guest of honor Mrs.Hima Bindu

The session started with a few queries related to IT industry and the way it works. Hima Bindu has given a brief introduction regarding the IT industry and its two major components I.e., IT services and business process outsourcing. Then she differentiated between the two components and explained about them individually. From simple shop bill, to railway ticket, electricity bill, to paying it everything is IT! . IT or Information technology deals with information - its storage, retrieval, usage, processing in relation to a business or similar enterprise or government. It is a complete system of information management using technology and computers and to communicate the same in controlled manner to authorized users appropriately.

Mrs. Hima Bindu addressing the gathering

IT sector is considered a sub sector of Information and communication sector. It involves computer systems with Hardware, Software, Network, Infrastructure and associated other equipment. Today this also includes, electronics, telecom, internet, semi-conductors and e-commerce and more. Today from IT products, software, tools, its maintenance and support, consulting and more form part of IT industry. BPO or what is called as call center etc are also making big revenue in today's IT sector. In fact with the AI and mobile technology there are more and more applications and products coming under the IT sector to replace many manual and people dependent industries. IT is now a part and parcel of every industry even medical, education, food, hospitality are slowly getting actively involved with IT products and tools and services.

She further explained the role of customers and the importance of communication between the customer and the industry for the growth of industry. She told the most important sector in IT industry is Customer relationship management. She explained five important ways to improve customer relationship. The first step is "to communicate" . Finding and understanding customer's problem and coming out the ideal solution gives a bigger satisfaction to the customer. The second step is "to exceed expectations" . She took an example of a quicker delivery of a product than the scheduled time. This impresses the customer and impressed, happy customers make more visits. The third step is "to ask for feedback" . Collecting feedback helps in the growth of industry. The fourth step is "to connect" . Making use of advanced technologies and reaching out to customers as soon as possible is a crucial step. The final step is "to show appreciation" . Good customers can be rewarded so that they become daily customers and we make them happy. Then the session ended with few other live examples and case studies on customer relationship management.

Impact Analysis

Event Name: Pointers in 14/12/2019

Pointer in C, is a variable that stores address of another variable. A pointer can also be used to refer to another pointer function. A pointer can be incremented/decremented, i.e., to point to the next/ previous memory location. The purpose of pointer is to save memory space and achieve faster execution time

contest participants have to solve three problem statements of various levels like easy, medium and high and should solve within one hour the code according to the instructions given. After Completion of this event the students are able to improve their skills like Ability to identify addressing of a variables, Idea generation, Ability to connect with the given program and ability to analyze to come up with solution for the given problem statement

The challenge is not just to write the logic before he or she is able to understand the concept of the problem statement, constraints given like time and space complexity and then write the logic to meet the test cases within time constraints, also to make logical sense through systematic and rational listing of ideas.

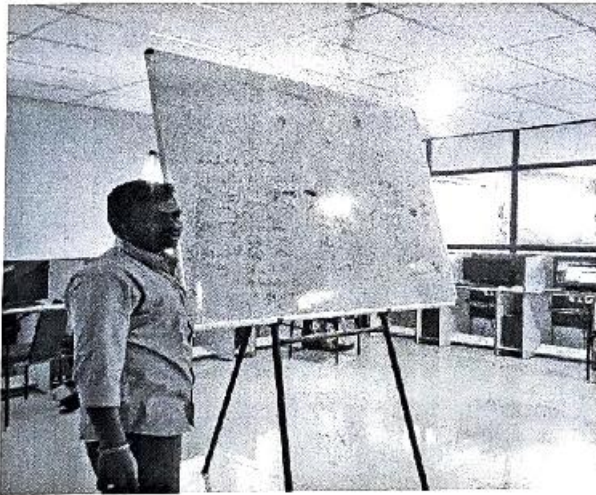

Outcome: Finally Students will be able to experience the concept of memory in programming

Guest Lecture

Topic :Big Data, Data analytics

Speaker :Prof Ganapati Panda, Professor, School of Electrical Sciences, Indian Institute of Technology, Bhubaneswar.

Professor Ganapathi addressing the audience

Professor Ganapati Panda worked as Dean (Academic Affairs) and Head, School of Electrical sciences of IIT Bhubaneswar and Dean (Administration) at National Institute of Technology, Rourkela. He was a member of Board of Governors of IIT Bhubaneswar and NIT Rourkela. He has done his Post-Doctoral research work at the University of Edinburgh, UK (1984-86) and Ph. D. from IIT, Kharagpur in 1981 in the area of Electronics and Communication Engineering.

He has started his words with a brief introduction to trends in IT industry. He said that Information Technology in India is an industry consisting of two major components: IT services and business process outsourcing (BPO). India's IT Services industry was born in Mumbai in 1967 with the establishment of the Tata Group. India's growing stature in the Information Age enabled it to form close ties with both the United States and the European Union. However, the recent global financial crises have deeply impacted Indian IT companies as well as global companies. As a result, hiring has dropped sharply, and employees are looking at different sectors like financial services, telecommunications, and manufacturing, which have been growing phenomenally over the last few years.

Head of the Department of
Computer Science & Engineering
Anil Neerukonda Institute of
Technology & Sciences
Sambalpur

With fundamental structural changes visible everywhere in the IT services due to Cloud computing, proliferation of Social media, Big data, Analytics all leading to digital services and digital economy, many of the leading companies in India's IT sector reported lower headcounts in their financial results.

The topic of emphasis has moved to Big data and its importance. The concept of big data has been around for years; most organizations now understand that if they capture all the data that streams into their businesses, they can apply analytics and get significant value from it. The new benefits that big data analytics brings to the table are speed and efficiency. Whereas a few years ago a business would have gathered information, run analytics and unearthed information that could be used for future decisions, today that business can identify insights for immediate decisions. The ability to work faster – and stay agile – gives organizations a competitive edge they didn't have before. Big data analytics helps organizations harness their data and use it to identify new opportunities. That, in turn, leads to smarter business moves, more efficient operations, higher profits and happier customers. The session ended with his enlightening speech about the importance of Big data analytics.

Memento presentation by Dr.R.Sivaranjani(HoD, CSE) to the speaker Dr.S.CSatapathy

Dr. Suresh Chandra Satapathy has worked in ANITS for 10 years. He pursued PhD in Computer Science and Engineering in the areas of specialization i.e., Computational Intelligence, Soft Computing, Machine Intelligence, Data Mining, Swarm Intelligence. He has 25 years of teaching experience and 10 years of research experience.

He has started his speech with a warm introduction of his experience in ANITS, the journey he had with students who aspired to achieve their dreams. He has mentioned that "ANITS is an alternative to a NIT where students can reach their desired destination by following their paths laid by their mentors." He has emphasized the way a student has to build his personality. With the emerging technologies and growing competition, he stressed the need of creating a unique identity for every student present over there. He also said that it is the student's responsibility to build his/her career to withstand the competition. In his words, smart work and determination to succeed can only help an individual to reach his/her goals.

Addressing the audience, upcoming computer science graduates, he explained the contribution of individuals to the world. He explained how

man should improve his intelligence to survive. He exemplified the day-to-day activities that a man does with the help of machine intelligence. He remarked that the man's zeal and passion towards advancement can lead to many more innovations. He continued saying, everything in this world is like a problem that has pre-defined solution, the only thing a man can accomplish is reaching the solution efficiently and quickly. There are different ways in which a problem can be solved but the ideal one receives fame and recognition. Therefore, every person who strives to solve a problem should put his/her efforts to get an ideal solution. Rigorous practice and research helps students achieve the expertise for their further inventions. He concluded his words by motivating students to achieve their goals.

Guest lecture

Topic: Analytical and problem solving skills

Speaker: Dr. Naeem M S Hannon, Associate Professor, Faculty of Electronic Engineering University Technology, Mara, Malaysia.

Memento Presentation by Professor Ramakrishna Murthy to Professor Naeem , Guest of honour.

Dr. Naeem has started his speech by extending his gratitude to the Head of the department, CSE and event coordinators. He has given a analytical problem to students to solve. He has given the answer and then explained the solution. He explained about analytical skills as Analytical skills refer to the ability to collect and analyze information, problem-solve, and make decisions. These strengths can help solve a company's problems and improve upon its overall productivity and success. We use analytical skills when detecting patterns, brainstorming, observing, interpreting data, integrating new information, theorizing, and making decisions based on multiple factors and options available.

He added that being good at analysis means being able to examine a large volume of data and identify trends in that data. One have to go beyond just reading and understanding information to making sense of it by highlighting patterns for top decision-makers. One must learn more about a problem before solving it. One will have to first collect data or information before analyzing it. Therefore, an important analytical skill is being able to collect data and research a topic. He further said that attaining good analytical skills helps in attaining good problem solving

CSI- Coding contest

Date : 07/12/2019 & 21/12/2019

Target Audience: 2/4 CSE

Programming requires a person to be creative and have insight about a problem as well as the ability to break the solution down into instructions that a computer can follow. Code refers to the language that a computer can understand. Though the computer is powerful enough to look through masses of data, it is stupid because each operation is mechanical and should be embedded manually.

Participants from the second years

CSI helps its students to nourish the ability to solve complex problems using coding. Competitive coding helps students know their standard in this competitive era. A coding contest is conducted exclusively for the students of 2/4 B.Tech from Departments of CS&IT of ANITS college by the ANITS CSI student chapter. The contest took place as two rounds. The first round of the contest took place on 07/12/2019 in which coding questions related to real time problems were tested. Taking Problem-solving skill as a criteria, the students who solved the problems are shortlisted for round 2. Out of 70 participated students from first round, 45 students are shortlisted to next round by considering optimal solution within time limit as criteria. The final round of the contest took place on 21/12/2019. Out of 45 shortlisted students Eswar Kishore, Prudhvi and Satya Sai Praveen secured 1st, 2nd and 3rd prizes respectively.

Coordination of the event

Sample question from Round-1 of the contest :

Given a string find the length of longest palindromic subsequence.

Input: abaccaabbaa

Output:6

Input:aaa

Output:3

Sample question from Round-2 of the contest:

Given an array of jobs where every job has a deadline and a profit. Profit can be earned only if the job is finished before the deadline. It is also given that every job takes a single unit of time, so the minimum possible deadline for any job is 1. How to maximize total profit if only one job can be scheduled at a time. Print the sequence of **jobID** order to maximize total profit.

Input example

JobID	Deadline	Profit
1	4	30
2	2	20
3	2	60
4	2	30
5	1	10
6	4	80

Output example: 4 3 1 6

REPORT

Two Days Workshop on "Automation Anywhere" 29.11.19 & 30.11.19

Two days workshop on "Automation anywhere" was organized by the department of Electronics and Communication Engineering (ECE) for the Third Year ECE students of ANITS (Anil Neerukonda Institute of Technology and Sciences). Trainers from FACE Academy, Visakapatnam, conducted the workshop from 29.11.2019 to 30.11.2019. About 150 students from third Year ECE were participated . The workshop is dedicated for beginners who have no previous experience with any RPAsoftware tool. During the course, students able to watch lecture videos on Automation Anywhere software and learn the following

1. What is RPA and How it is used in Automation?
2. Develop and program one's own BOT using Automation
3. To build the virtual workforce.

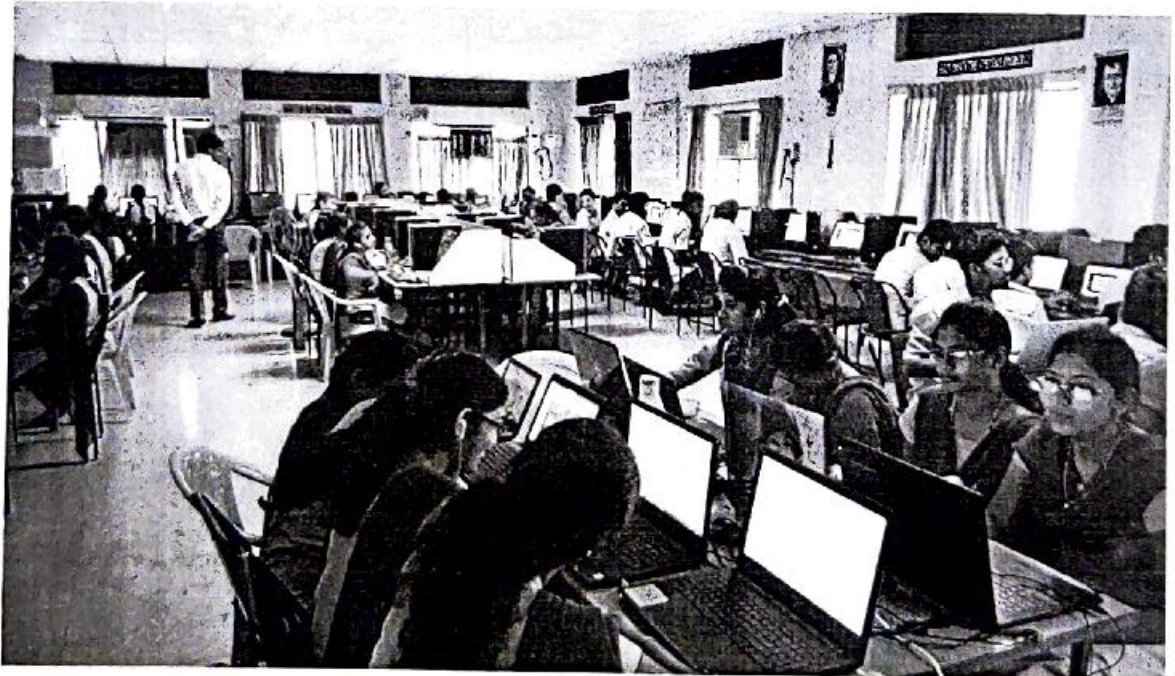

The program was conducted in the Project lab(ECE) & Sales force lab (IT)

Mr. N. Ramkumar, Workshop Coordinator & Assistant professor of ECE department thanked the trainers for tirelessly supporting & encouraging the students during this Two Days.

Database Design and Programming with SQL

Overview

This course engages students to analyze complex business scenarios and create a data model—a conceptual representation of an organization’s information. Participants implement their database design by creating a physical database using SQL. Basic SQL syntax and the rules for constructing valid SQL statements are reviewed. This course culminates with a project that challenges students to design, implement, and demonstrate a database solution for a business or organization.

PYTHON PROGRAMMING

Python is an interpreted, object-oriented, high-level programming language with dynamic semantics. Its high-level built in data structures, combined with dynamic typing and dynamic binding, make it very attractive for Rapid Application Development, as well as for use as a scripting or glue language to connect existing components together. Python's simple, easy to learn syntax emphasizes readability and therefore reduces the cost of program maintenance. Python supports modules and packages, which encourages program modularity and code reuse. The Python interpreter and the extensive standard library are available in source or binary form without charge for all major platforms, and can be freely distributed.

Often, programmers fall in love with Python because of the increased productivity it provides. Since there is no compilation step, the edit-test-debug cycle is incredibly fast. Debugging Python programs is easy: a bug or bad input will never cause a segmentation fault. Instead, when the interpreter discovers an error, it raises an exception. When the program doesn't catch the exception, the interpreter prints a stack trace. A source level debugger allows inspection of local and global variables, evaluation of arbitrary expressions, setting breakpoints, stepping through the code a line at a time, and so on. The debugger is written in Python itself, testifying to Python's introspective power. On the other hand, often the quickest way to debug a program is to add a few print statements to the source: the fast edit-test-debug cycle makes this simple approach very effective.

Course Overview

Students in the architectural or engineering sector will benefit greatly from having a certificate in this type of training. It enables the person to join a company and get to work, understanding the software and helping them be a productive member of the team from day one.

Targeted audience : 1st & 2nd year students

Workshops (Certification training) with Industry certifications

The objective of workshop is to see that the students are well trained for the prerequisite courses of certification.
Duration: 6 days

Assessments/Practice test: To ensure that students have understood the content covered during the session; a brief test will be conducted on LMS after every training session. This will help the student understand where he/she needs to improve, make them ready to enter level 1-User certification or Level 2-Professional certification depending on the performance. LMS (Learning and Management System) is built from OpenEdx. It contains all course related content as hand-outs, videos and practice sessions. APSSDC will provide individual student account and Student/college analytics are also available.

Level Certification:

Level 1 User (CU) certification is an excellent way for students with about real-world User software experience to validate their software skills.

<https://www.youtube.com/watch?v=TjBTPEBabPw>

Professional Level Certification:

Level 2 Professional (CP) is the logical credential for advanced and professional software users who possess of about 3 years of world Professional software experience.

INTERNET OF THINGS USING ARDUINO

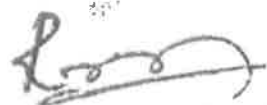

Three days workshop at ANITS by APSSDC

Three days workshop on “Internet of Things using Arduino” was organized by the department of Electronics and Communication Engineering (ECE) for the Second Year ECE students of ANITS (Anil Neerukonda Institute of Technology and Sciences). Trainers from AP State Skill Development Corporation (APSSDC), Vijayawada, conducted the workshop from 07.02.2019 to 09.02.2019. About 145 students from Second Year ECE were participated and gained hands-on experience using Arduino from the scratch to the complex application

development. The program was conducted in the Digital Signal Processing and Simulation Laboratories of the ECE Department. This program was presided by Dr. V. Rajya Lakshmi, Professor & HOD, Department of ECE.

During this workshop students exhibited their skills by writing program in Arduino IDE and made physical connections with LCD display, Multicolor LEDs, 7-segment displays, IR & Ultrasonic sensors, servo motors, LDR module etc. Also, they were practiced and experienced with Tinker CAD software to develop IoT applications. To mark their talents, the students have developed Home automation systems with various controlling functions using Arduino. The students were very much happy by developing applications on their own and thanked the HOD, Faculty and student coordinators for their valuable support and guidelines and expressed their heartfelt thanks to the trainers of APSSDC Vijayawada for their caring approach during programming and experimental practices. Mr. N. Srinivasa Naidu, Workshop Coordinator & Assistant Professor of ECE department thanked the trainers for tirelessly supporting & encouraging the students during these three days.

ABOUT THE COLLEGE

Anil Neerukonda Institute of Technology and Sciences (ANITS), Visakhapatnam was established in 2001 by Anil Neerukonda Educational Society (ANES). ANES works to promote technical and human values through various educational institutions, without any motive for profit. ANITS is located in Sangivalasa village of Bheemuni patnam mandal, about 30 km from the beautiful city of Visakhapatnam. The college has been accredited by NAAC, NBA, UGC and attained autonomous status in the academic year 2015-16. The college has been awarded "Centre of Excellence" by Infosys Technologies in the year 2011 and "National Employability" in 2014 by Aspiring Minds, New Delhi. Undergraduate and postgraduate programs in CSE, IT, EEE, ECE, Mechanical, Civil and Chemical Engineering are being offered at ANITS. With a unique team of governing body, inspiring management, and proficient educators, ANITS envisions to emerge as a world-class technical institution whose products represent a good blend of technological excellence and the best of human values.

ABOUT THE DEPARTMENT

The Department of Chemical Engineering was started in the year 2012 and has an efficient group of faculty from IISc, IITs, BITS and other reputed state universities. The department is well equipped with chemical and interdisciplinary laboratories.

The faculty participate actively in the state-of-the-art research and continuously thrive to update knowledge and skills. The same is imparted to the students in classrooms by conducting workshops, seminars and conferences to craft the next generation of engineers. Modern teaching methodologies are implemented to foster an improved classroom environment. *The department envisions to emerge as centre of excellence in Chemical Engineering and attain global recognition in fulfilling the needs of industry and society.*

ABOUT THE WORKSHOP

Indian Chemical Industries contribute to 6% of our GDP (\$ 135 billion). For efficient technological production of chemicals, a chemical engineer requires thorough understanding of the process that comprises of various equipment like reactors, heat exchangers, distillation columns, etc. and numerous instruments like pressure gauges, flow meters etc. **Process Flow and Instrumentation Diagrams** help Chemical Engineers not only to understand the underlying process, but also in evaluating various process controls to optimize the production and to safeguard against possible workplace accidents. This workshop aims at bridging the gap between the academic and industrial approach of studying and understanding the **Process Flow and Instrumentation Diagrams** by providing **hands-on experience** to the fresh chemical engineers to face the challenges when they start working in the industry.

Impact analysis of "Programming Challenges using C" workshop from 03/12/2018 to 22/12/2018

WORKSHOP OUTCOMES:(WOs) :

At the end of the workshop students were be able to

1. Classify different data types, its sizes, and how to select appropriate data type in C programming
 2. Write C programs, compile and run using Geany IDE.
 3. Write C programs using arithmetic expressions, logical expressions, conditional branching, arrays, loops, structures, unions and pointers in C programming
 4. Write programs to read, write, modify files using C and develop their own library in C
 5. Solve interview questions based on C programming raised from software industries
- About 200 students from Thrid Year ECE were participated and gained hands-on experience in C programming
 - Trainers from AP State Skill Development Corporation (APSSDC), Vijayawada, conducted the workshop
 - During this workshop students written and compiled the C programs that covers the most basic details of C programming (data types , operators, loops, arrays, pointers, etc) to the advanced level concepts (file handling, library development, etc)
 - The trainers supported the students to write error free programs and to compile and verify the results of their programs in Geany IDE, which is an open source C compiler.
 - Also, they were attempted TCS code vita tests to identify their skill levels and the area to be strengthened in order to crack the software company interviews.

Report

A 2-days workshop on Robotics with Artificial Intelligence for the students of undergraduates was organized on 23th and 24th Feb 2018 by department of Electronics and Communications Engineering in association with INV Technologies Visakhapatnam. Initial aim of the workshop sessions was to motivate students in design, estimation, fabrication and testing their own ideas of basic controlled robots using AI and IoT.

This workshop comprises of giving the participating students an idea about Robots, Robotics, Types of Robots and their applications, Career in Robotics, Introduction to Artificial Intelligence and IoT. There is considerable anecdotal evidence that students respond well in subjects involving programming of robots. Programming can be too abstract. By having to control a physical robot and seeing what goes wrong, students learn what robots can and can't do. They also learned the need for precise instructions. There's no doubt that there will be a need for people to be involved in programming mechanical devices in the foreseeable future. By programming robots, students can discover if they have aptitude and interest in a job market of the future. Programming Skill will be developed. They will read data from board, on sensor and social network.

In the first day students got familiar with the term Robot, how to identify whether a machine is a Robot or an autonomous bot, Robotics, Aspects of Robotics, philosophy of AI (Artificial Intelligence), Brief on Machine Learning and types of Robots. Informative videos from Boston Dynamics were shown to students. In the Second day students got familiar with, applications of AI and IoT were explained and showed. Applications included S.O.S Morse code, Bluetooth Controlled RC Car using simple LED and Arduino coding; Traffic Light Signaling using LED and Arduino coding.

Feedback from the students was collected and it suggested that they welcomed this initiative and they are motivated to explore more dimension in this platform also they are willing to do projects, research work and developing robots for competitions in future.

Guest Lecture cum Interactive Session on "Improving Energy Efficiency of Chemical Processes: Potential and Technologies"

Department of Chemical Engineering ANITS organized a guest lecture on 28th December 2017 by Prof.G.P.Rangaiah, Adjunct Professor, Department of Chemical and Biomolecular Engineering, National University of Singapore. He enlightened students on importance of Chemical Process Calculations and Thermodynamics to potentially improve the energy efficiently. He also focused on heat exchanger networks, pinch analysis, dividing wall column and process intensification. He emphasized on energy recovery, reuses and efficiency which can be done effectively only when basic knowledge on engineering fundamentals are good. He addressed various energy saving techniques for process industries. He also focused on importance of communication skills. Prof.T.V.Hanumantha Rao, Principal ANITS, faculty and students of Chemical Engineering attended the session.

Guest Lecture on "Recent Trends in IT Industry"

IT is becoming more and more a gamechanger in the industry. The IT trends for 2018 are dominated by artificial intelligence, followed by the cloud and innovative digital platforms such as fog computing, serverless PaaS and blockchain. 5G is also becoming increasingly important as a key technology for the implementation of Industry 4.0.

1. Artificial intelligence still on the upswing

Due to the massive increase in data and computing power, the capabilities of Artificial Intelligence (AI) have been expanded in recent years to such an extent that computers are now able to learn just like humans. AI is a megatrend that combines machine learning technologies such as artificial general intelligence (AGI), deep learning and deep reinforcement learning as well as cognitive computing:

Artificial General Intelligence

(AGI), also known as Strong AI or Full AI, is an artificial intelligence that is already very similar to human intelligence.

Deep Learning

describes as part of machine learning a deeper learning via artificial neural networks. These include image, speech and face recognition. Chatbots also learn in this way by continuously improving their vocabulary and being able to talk to customers in the waiting loop. Other applications include autonomous driving and forecasting customer behavior based on data from a company's CRM system.

Deep reinforcement learning

is a profound strengthening learning based on the principle of reward and punishment. An "agent" learns a strategy to get the maximum reward.

Cognitive Computing

simulates human thinking processes in a computer model (e.g. IBM Watson). Technical methods include data mining, pattern recognition and natural language processing.

2. Cloud-based platforms are growing

The trend towards outsourcing the IT landscape to the cloud will continue in 2018. In order to use digital technologies such as Internet of Things (IoT), Artificial Intelligence or Augmented Reality more flexibly and scalably, the use of platform services from cloud providers is becoming increasingly necessary.

In addition, more and more companies are sharing smart contracts, operational data and machine know-how in the cloud or meeting with suppliers in the cloud. Enterprise Resource Planning (ERP) tools are also increasingly finding their way into the cloud, as this enables companies to better control their processes and makes their daily work easier and more efficient.

Industry 4.0 projects, data-supported business models and increased customer sensitivity also require a high level of data protection and data security. As experienced cloud providers today can guarantee a higher level of data security than is often feasible in companies, more and more IT managers are opting for a cloud-based platform.

Companies such as Siemens with its Mindsphere Platform or Robert Bosch with its IoT platform point the way here. In the future, too, applications for the cloud will increasingly be created, containerized and orchestrated as "Cloud-native" apps.

3. Fog Computing as an alternative to Cloud Computing

Fog Computing or Edge Computing will become increasingly important for companies as an alternative to coping with the flood of data that occurs in a completely networked world. The main reason for this development is that the cloud's bandwidth is too small to be able to process the huge amounts of data.

Fog Computing brings analysis, processing and storage functions to the edge of a network. In future, intelligent routers will be used to carry out processing tasks directly on site. Data is pre-filtered and only selected data migrates to the cloud. In this way, the cloud is relieved. Companies should therefore start integrating edge design patterns into their infrastructure architectures - especially those with significant IoT elements.

4. Trend to own 5G networks for industry

5G, the fifth generation of mobile radio, is expected to enable data transfer rates of up to 10 gigabits per second and thus make the Internet almost 10 times faster. Accordingly, as a key technology it has the potential to revolutionize the way industry and consumers use the Internet.

The technology accelerates the development of Industry 4.0 applications in particular and enables completely new system approaches and solutions in factories to realize more flexible and efficient production methods. However, Gartner analysts expect only three percent of vendors to bring the new standard to market by 2020. German industrial companies therefore do not want to rely on the networks of mobile phone operators and have recently called for their own 5G networks for industry.

The guest discussed the above topics and the lecture ended with thanks.

Seminar on Web Technologies and Cyber Security

Cyber Security or information technology Security is a field within information technology involving the protection of computer systems and the prevention of unauthorized use or changes or access of electronic data. It deals with the protection of software, hardware, networks and its information. Due to the heavy reliance on computers in the modern industry that store and transmit an abundance of confidential information about people, cyber security is a critical function and needed insurance of many businesses. It also protects computer systems from theft or damage.

Common Vulnerabilities

Vulnerabilities in Cybersecurity system can come from many different factors. Most of these center around any inherent faults within the system itself, how easy it would be for a cyber attacker to break through any securities the system may have set up, and/or how easy it is for the cyber attacker to use the fault in the system to their advantage. One of the most common faults found in systems that can be abused by attackers is when a system is too complex. The more detailed a system becomes, the harder it is for cybersecurity to cover all the flaws. Thus, creates more opportunities for attacks to make their mark. Also, whenever user input is a variable, there can be ways into a system. This is because it is difficult for a programmer to predict and account for all possible inputs from a user. Attackers could affect the system depending on their inputs which would allow them to exploit the system further.

Denial of service attacks

Denial of service (DoS) attack is a type of cyber attack that floods a network with multiple requests of information with the purpose of shutting down or disrupting services of a host connected to the internet. It may also prevent users of a service running through the targeted server or network.

Direct-access attacks

This form of vulnerability is when a system is physically accessed by an unauthorized user. This allows the user to make modifications or attach backdoor hardware or software in order to access the system remotely. The unauthorized user can also make complex changes to the system due to having direct access to the hardware.

Pharming

Pharming is a form of online fraud that redirects users from legitimate website's traffic to another fake site. Hackers can use pharming by using tools that redirects users to a fake site. The victimized

Head of the Department of
Computer Science & Engineering

Technology & Sciences
Sangivalasa, Visakhapatnam Dist

users will go to a fake website without noticing it is fake. Hackers use this method to steal personal data from users' computer. Hackers exploits the DNS server or called DNS poisoning that makes users think the fake sites are legitimate.

Phishing

Phishing is an email that claims to be a genuine business in an attempt to swindle the user into surrendering sensitive information. The personal information that they receive is then used to steal their identity and can result in a loss of financial freedom.

Social Engineering

Social engineering involves human interaction and the manipulation of people to give up confidential information. The purposes for this technique include fraud, system access or information gathering. It is easier for someone to fool you into giving them a password or bank information than it is for someone to try hacking in order to get the information.

Other Vulnerabilities

There are other vulnerabilities and ways that hackers can gain access of a system. They can use backdoors which is a different method of accessing a computer or network that bypass the authentication and security. Spoofing can also be used to trick a receiver by pretending to be a known source to the receiver. Private escalation can be used to elevate an attacker's access level which will give them access to every file on a computer just like a root user can. A more complicated one is clickjacking. This is when an attacker inverts the user's clicks to buttons or links that take the user to another website.

The Author discussed the above topics and the seminar ended with thanks.

REPORT on "Automobile Explorations – Autotrix"

Dt. 18-12-2017

ANITS SAE Collegiate club has organised a two days workshop on "Automobile Explorations – Autotrix" in the department of Mechanical Engineering ANITS during 15th & 16th Dec, 2017. The workshop was inaugurated by Dr. NBR Prasad (Chairman of ANES), Dr. TV Hanumanth Rao (Principal of ANITS), Dr. B NagaRaju (Head of the Mechanical Department), Mr. M Prem Dheeraj (Faculty Co-ordinator of ANITS SAE Collegiate club) and Mr. Harish Dasari (Assistant Manager, M&M Zaheerabad)

The workshop consisted of both technical presentations and practical sessions. Mr. Harish Dasari, Assistant Manager from Mahindra & Mahindra (M&M Zaheerabad) has outlined the recent trends in automobile engineering and the opportunities awaiting young engineers in this canopy. Other technical presentations were taken up by various experts from JV Workshops, CarPixels, and other automobile firms. The two days workshop includes practical sessions on two wheeler tear down and assembly, where a group of 12 students were given a bike to explore by disassembling that. Students have spent more than 5 hours in learning about all major components of bike and their functioning.

Besides a discerning learning experience on two wheelers, students could also gain an outline of four wheeler engine and other components in the bonnet. The illustration of various assemblies and components observable from the bonnet of the car has helped the students acquire deeper understanding about the functioning of a car in its totality. Students also enquired about several troubleshooting aspects of car.

In the valediction of this workshop students had given their feedback and described the richness of knowledge that they could bag in this workshop. The further requested the Co-ordinator and Head of the Department to organise more such events, in response to which a summer internship with JV workshops was planned out.

More than 126 students had participated in this workshop and about 8 Student Volunteers have rendered their services for the smooth coordination of event. The sessions organised were found to be more interactive and practical with major focus on hands-on sessions.

Towards the end of workshop, students were also given an invitation to attend a 10 day internship program which is certified by Germany in relation to automobile service and

ABOUT THE COLLEGE

Anil Neerukonda Institute of Technology and Sciences (ANITS), Visakhapatnam was established in 2001 by Anil Neerukonda Educational Society (ANES). ANES works to promote technical, and human values through various educational institutions, without any motive for profit. ANITS is located in Sangivalasa village of Bheemunipatnam mandal, about 30 km from the beautiful city of Visakhapatnam. The college is accredited by NAAC, NBA, UGC and attained autonomous status in the academic year 2015-16. The college was awarded "Center of Excellence" by Infosys Technologies in the year 2011 and "National Employability" in 2014 by Aspiring Minds, New Delhi. The college offers undergraduate and post graduate programs in various disciplines of engineering such as CSE, IT, EEE, ECE, Mechanical, Civil and Chemical Engineering. ANITS has strived to train young men and women into confident and competent engineers. With a unique team of governing body, inspiring management, and proficient educators, ANITS continues to march forward with greater zeal and dedication to become a world class educational institute.

ABOUT THE DEPARTMENT

The Department of Chemical Engineering was started in the year 2012 and has very efficient team of faculty. The faculty participate actively in state of the art research and continuously thrive to update knowledge and skills. The same is imparted to the students in class rooms by conducting workshops, seminars and conferences to craft the next generation of engineers.

The department is well equipped with chemical and interdisciplinary laboratories. Modern teaching methodologies are constantly implemented to foster an improved class room environment. Team work among students is encouraged to inculcate positive work habits and passion to work wisely, creatively and effectively.

ABOUT THE WORKSHOP

Indian chemical industries emerge as one of the focus destinations for chemical companies worldwide, which accounts to \$ 36 billion (3% of the global economy). In addition to producing bulk and fine chemicals through traditional routes, the industries are now focussing on novel technologies such as nano-technology, fermentation and biofuels. The technology of production of chemicals requires intense understanding of process flow sheets which comprise of various types of reactors, pumps, heat exchangers, condensers, distillation and absorption columns etc. The detailed study of process flow sheets coupled with process control helps the chemical engineer to produce the products at maximum productivity. It also allows varying the process conditions in case of any fire and explosion in the industry. This workshop helps in bridging the gap between academic and industrial approach to study the flow sheets. The workshop covers topics like overview of process engineering in industrial perspective, various pumps, process flow diagrams, piping and instrumentation diagrams, trouble shooting etc. The workshop also aids in facing the challenges arised when the fresh engineers start working in the industry

Technical Talk on Machine Learning and its Applications:-

The Dept. of IT has hosted a Technical Talk on Machine Learning and its applications on 13-10-2017 to 14-10-2017. The resource person for this Technical Talk is Mr. V. Sunil Kumar, Principal Scientist, Philips Research India Ltd Bangalore. This guest Lecture focused on enriching the students about how machine learning focuses on developing computer programmes in such a way that it can access data and can learn for themselves and the value of machine learning technology has been recognized by companies across several industries that deal with huge volumes of data. By leveraging insights obtained from this data, companies are able work in an efficient manner to control costs as well as get an edge over their competitors how some sectors / domains are implementing machine learning .
