### Recommendations

1. AC energy savers can be used to reduce the energy consumption of AC by 30-40 %.
2. LED bulbs can be used to save more electricity. The luminary distributions in rooms needs to be improved.
3. Street lights can be replaced with 7 W lithium battery based solar street or solar mass lights.
4. Solar off-grid system can be installed to supply back-up power instead of 500 kVA diesel generator set. The diesel generation set is not eco-friendly and also involves the consumption of costly diesel.
5. The institute has two 3 HP and two 2 HP water pump sets. These can be replaced with solar water pump sets.
